**WE HAVE  
 DECIDED TO  
 REVISE THE HARD  
 FRONT RUBBER  
 COMPOUND**

The surface is not very abrasive but the track is very fast, especially in the sequences of the second part. Based on the data we recorded over the last few years (the asphalt was redone in 2020), we have decided to revise the Hard front rubber compound. The Soft and Medium compounds will be the same as last year, but the Hard will be a little harder - a little more rigid. We are also responding to the fact that the motorcycles are a little more aggressive on their front tires. The fronts will all be symmetrical, but the two rear compounds (Soft and Medium) will be reinforced on the right side, to compensate for the greater number of turns in this direction.

# WORLD CHAMPIONSHIP

2023 FIM ENEL MotoE™

*Michelin has been the FIM MotoE™ World Championship's sole tyre supplier since the all-electric competition was first organised in 2019. The Group sees this highly competitive series as a full-scale research and development laboratory where it can explore and test technological innovations in exacting conditions. Not only have the unique opportunities for innovation that MotoE™ offers seen Michelin increase the proportion of renewable and recycled raw materials that its tyres for the championship contain, but they are also speeding up the emergence of specific solutions for tomorrow's electric motorcycles and scooters.*

**Michelin sees MotoE™ as a means to accelerate innovation as it prepares for tomorrow's world of two-wheel mobility, with powerful analysis and smart data at the heart of its development processes.**

## ***A NEW DESIGN FOR THE REAR TIRE***

This unique design features a head-turning look. Inspired by Michelin's VISION Concept, its ephemeral, velvet-effect Race to Vision motif vanishes once racing begins. VISION is the fruit of the sustainable development model conceived to contribute to Michelin's plan for 2050 and beyond.

## ***RENEWABLE AND RECYCLED RAW MATERIALS***

The MICHELIN MotoE range of tires contains 49 and 53 percent renewable and recycled materials front and rear respectively, compared with 34 and 52 percent in 2023.

# ALLOCATION

## A single front rear pairing

- ✓ **Perfect versatility:** the tires adapt to all the season's circuits
- ✓ **Performance:** increase the performance of 2023 while increasing the percentage of recycled and renewable materials
- ✓ **Grip:** offering grip from the very first corners

### ALLOCATION PER RIDER

#### 8 MICHELIN Power slicks MotoE of the same specification

4 new front tires and 4 new rear tires  
+ 1 a bedded-in set from the previous race

#### 7 MICHELIN Power Rain MotoE of the same specification

3 front tires and 4 rear tires

- Riders who participate in both Q1 and Q2 qualifying sessions (maximum 2 riders) will be allocated one extra rear slick tire after Q2 (therefore, if taken, a maximum of 5 rear new slick tires).
- In the case that Q1 and Q2 sessions are both declared wet by the Race Director, the extra tires allocated will be rain tires.
- In the case that Q1 and Q2 sessions are declared as different weather conditions then no extra tire will be allocated.
